Some soaps and cleaners are harsh and can be toxic. Ego QV ones are toxin-free and available from chemists without prescriptions. They are dermatologist recommended. Muscle test all your soaps and detergents and the Ego ones and you'll be amazed. Test paper towels and toilet paper at the same time. We use Handee Original and Sorbent Hypo-allergenic, both made in NZ. A very unwell friend with lots of allergies was using toxic ones. Doctors and specialists have told me that they have unwell patients and don't know why. I know that Roundup, Obesity, Gluten, Heavy Metals such as Manganese, are some.

Ego QV Wash is for normal showering and bathing.

Ego QV Skin Lotion is a soothing moisturiser for the prevention and treatment of dry skin, scaly skin, winter itch, ichthyosis and other genetic thickened, scaly or flaky skin disorders.

Dr Anthony Yong, MBChB, FRACP, CCST (Dermatology, UK.) 33 Tawa St, off Kahikatea Drive, Hamilton. Ph 843-0017. You may need a doctor's referral. I was referred to him by my doctor because of a damaged thumb nail with a fungal infection and skin problems. He stopped me covering the nail with a bandage and it immediately dried up, and got better. His knowledge about improving skins was amazing. He suggested using Ego QV liquid soaps. My skin was dry.
