

**Solmin Mineral Mix for drinking by Cattle, Sheep, Camelids and Goats. Invented by Vaughan Jones in 22 April 1989.**

Solmin is designed to be fed onto correctly fertilised farms at rates using ryegrass leaf analyses from Hill Lab, then use the two spreadsheets. Lime and Phosphate Nutrient Planners to plan the correct applications. See [grazinginfo.com](http://grazinginfo.com) for the complete information in 300 chapters. See the 200 Testimonials.

	<b>kg</b>
Salt fine pink Himalayan if possible or V46	890.000
Magnesium Sulphate Heptahydrate	96.000
